PROFESSIONAL SUMMARY

C++/Qt Software Engineer with 1+ year of experience building 2 enterprise desktop products (EmpMonitor and Secure RDP Controller) and system components across 3 platforms: Windows, Linux and macOS. Skilled in Qt (Widgets, QML), C++11/14/17/20, multithreading, WinAPI, TCP/IP socket programming, REST APIs, JSON and SQLite. Delivered employee monitoring, Data Loss Prevention (DLP), remote desktop and Host-Agent communication features. Strong foundation in data structures, operating systems, design patterns, unit testing, and embedded/firmware concepts.

TECHNICAL SKILLS

Languages: C++ (C++11/14/17/20), C, Python, Java, JavaScript, SQL, Shell Scripting

Qt & Desktop: Qt 5.15, Qt Widgets, QML, Qt Network, Qt SQL, Signals & Slots, QThread, Qmake, WinAPI, Windows UI Automation, Multithreading

Networking: TCP/IP Sockets, REST APIs, JSON, WebSocket, Client-Server Architecture, SPI, UART

Core CS & Design: Data Structures & Algorithms, Operating Systems, Computer Networks, OOP, Design Patterns, UML, Requirement Analysis

Databases: SQLite, MongoDB

Testing: Unit Testing, CppUTest, Integration Testing, Automation Testing

Platforms: Windows, Linux, macOS

Tools & Practices: Qt Creator, Visual Studio, CMake, Git, GitHub, Code Review

PROFESSIONAL EXPERIENCE

Software Developer | Globussoft Technology Pvt. Ltd. *Aug 2025 – Present*

EmpMonitor – Enterprise Employee Monitoring Platform

Tech Stack: *Qt Widgets, Qt Network, TCP/IP, TCP Sockets, REST APIs, JSON, RDP, Windows APIs*

- Developed inbound and outbound email monitoring for 4+ providers (Gmail, Zoho, Thunderbird, Outlook) using email protocols and Qt Network communication workflows.
- Implemented endpoint security and DLP controls covering 5 channels (clipboard, file upload, website, application, USB/storage device) to monitor and block policy violations.
- Integrated OCR-based text extraction to capture application titles and on-screen content for monitoring modules.
- Implemented screenshot and screen-recording features for activity monitoring and compliance use cases.
- Developed 2 webcam-based detection workflows: user-presence and device/phone detection.
- Integrated REST APIs with JSON-based communication between the desktop agent and backend services.
- Implemented SQLite-based local data storage and configuration management.

Secure RDP Controller – Remote Desktop Solution

Tech Stack: *Qt Widgets, Qt Network, TCP/IP, TCP Sockets, REST APIs, JSON, RDP, Windows APIs*

- Developed a C++/Qt Host-Agent architecture for secure remote VM access, session management, configuration synchronization and endpoint control.
- Implemented TCP/IP socket communication and JSON-based messaging between Host and Agent applications.
- Implemented secure tunneled communication for remote VM connectivity and Host-Agent interaction.
- Developed VM connection/disconnection and session lifecycle management, including connection state handling and remote-session controls.
- Implemented 3 session safeguards (session timeout, inactivity detection, agent timeout) plus connectivity monitoring for controlled remote sessions.
- Developed screen-capture and screen-recording protection controls for connected virtual machines.
- Implemented 2-way clipboard and file transfer between local machines and remote VM environments.
- Worked on port/proxy forwarding and group-based connectivity for controlled VM network access.

EDUCATION

Bachelor of Engineering, Computer Science Engineering *2021 – 2025*

Visvesvaraya Technological University | CGPA: 8.0
